

**Royal is committed to adding value through the integrated design with our engineering and construction teams.**

Royal Engineers & Consultants is recognized as a leader in the Architectural and Engineering (A&E) industry with a reputation for delivering exceptional service to clients while enhancing the lives of the people and communities where we work. Royal has been delivering A&E services to our clients with a portfolio of both large scale and small scale renovation and new construction projects. Royal's diverse team of architects, engineers, construction managers, and inspectors provides a depth of knowledge and expertise giving our clients the best service in the true spirit of the A&E concept.

Royal's Architecture Service capabilities includes programming, schematic design, design development, construction documents, construction administration, 3-D rendering, sustainable design, and predevelopment consulting services.

Royal prides itself on an exceptional track record that exemplifies our unwavering commitment to providing quality services to our clients. We provide added value to our Architecture services by integrating architectural design with our engineering and construction expertise, while maintaining our primary focus on our clients needs.
